

ES20

Westone® Elite Series™

- Provides a natural, spacious sound and clear left to right detail
- Dual-driver design
- Fully custom fit with a variety of customizable looks

Custom made to provide a precise, comfortable fit, the dual-driver ES20 provides exceptional low frequency response, smooth mids, and articulate highs—a great balance of full sound and price with 25dB of ambient noise reduction.

ES20 Specifications

SENSITIVITY:

SENSITIVITY: 119 dB SPL @ 1 mW

FREQUENCY RESPONSE: 20 Hz - 18 kHz

IMPEDANCE: 27 ohms @ 1 kHz

PASSIVE NOISE ATTENUATION: 25 dB

DRIVER: 2 balanced armature drivers with passive crossover

CABLE: EPIC replaceable cable

CABLE LENGTH: 52" / 132 cm

BODY: Acrylic with flex canal

FEATURES: Monitor Vault II, cleaning tool, cable management ring, desiccant pod, cleaning cloth, Oto-Ease, users manual, and 2-year warranty

HIGH PERFORMANCE EARPHONES

Ideal for:

On-Stage Monitoring, Personal Listening, Field Recording

Westone Custom-Fit Technology

Fully custom earpieces are cast, sculpted, and polished by hand from actual impressions of your ears, resulting in the best fit and acoustic seal possible.

Balanced Armature

Westone's balanced armature drivers are significantly more compact and efficient than traditional dynamic drivers. By combining multiple balanced armature drivers with sophisticated crossover networks, Westone monitors provide enhanced sonic detail and frequency range that extends well beyond typical in-ear solutions.

Flex Canal

A body temperature-reactive, semisoft earpiece canal additive that stays firm at room temperature for ease of insertion and then softens at body temperature, allowing increased comfort and acoustic seal for incredible noise isolation.

Cold Pour Acrylic

Earpiece housings are cold-poured in acrylic for a thicker, more resilient acoustic enclosure. Expect increased durability, a more controlled response, and a lustrous appearance from this Westone technology.

Dual Bore

With Westone's Dual Bore technology, high and low frequency sound components are channeled through separate passages in the sound port and sum within your ear canal instead of the earpiece. The result is a more convincing transition between frequency ranges and is audibly more natural.

EPIC Replaceable Cable

Westone's robust EPIC cable is constructed of bifurcated, high-flex, ultra-low resistance tinsel wire, reinforced with a special aramid fiber, and braided for ultimate durability, acoustic transparency, and isolation from mechanical cable noise. The MMCX audiophile connector makes this solution conveniently user replaceable.

Made in the USA

Meticulously built by a staff of dedicated artisans and lab techs, Westone's USA products exhibit a level of craftsmanship that truly embodies America's rich history of handmade artistry.
